

Presenting Author	ID	Title
Aissiou F.	P-208	New insights into the genetic diversity and reproduction of Brassica rapa L.
Alahakoon A.Y.	P-217	Can cold and freezing stress in canola be alleviated by the expression of Arabidopsis thaliana ACYL-COENZYME A-BINDING PROTEIN 6?
Ali A.	P-200	Selection efficiency in early breeding of Australian adapted Indian mustard (Brassica juncea)
Avice J.-C.	P-302	Nitrogen remobilization efficiency of Brassica napus: what is the proteolytic machinery associated with the senescence of siliques ?
Azibi T.	p-102	Shift to self-compatibility in synthetic allopolyploid Brassica napus
Balesdent M.-H.	P-623	Evolution of populations of Leptosphaeria maculans, a fungal pathogen of oilseed rape, under resistance selection pressure: insights from two decades of surveys in France
Belser C.	P-112	Chromosome-scale assemblies of Brassica oleracea and Brassica rapa using nanopore long reads and optical maps
Bianchetti G.	P-504	Impacts of drought stress on seed yield and quality in oilseed rape
Boter M.	P-400	Warm temperatures differentially affect root traits in Brassica napus varieties
Bouchereau A.	P-304	Insights into proline metabolism as a protagonist of nutrient remobilization efficiency in oilseed rape (Brassica napus L.)
Bousset L.	P-602	Resistance to Leptosphaeria maculans in condiment mustards could be challenged with the deployment of the Rlm6 resistance gene in oilseed rape crops
Bretaudeau A.	P-111	BBIP, Brassicaceae Bioinformatics Platform
Brunel-Muguet S.	P-300	Induction of heat stress memory to face negative impacts of high temperature during seed filling on seed quality in oilseed rape (Brassica napus L.)
Chakrabarty S.	P-101	Analysis of a candidate gene involved in Verticillium longisporum resistance in winter oilseed rape using a RNA-guided CRISPR-Cas9 system
Coriton O.	P-106	Plant molecular cytogenetics Platform
Corlouer E.	P-301	Identification of the main factors limiting seed yield in rapeseed helps dissecting the environment and GxE effects
Delourme R.	P-604	A repertoire of the genomic regions involved in quantitative resistance to blackleg in winter oilseed rape was established from combined linkage-based QTL and genome wide association mapping
Delourme R.	P-607	Exploiting Genome Wide Diversity for disease resistance improvement in oilseed rape
Dolotabadian A.	P-223	Characterisation of disease resistance genes in the Brassica napus pangenome
Francisco M.	P-213	Fine mapping and candidate gene analysis for a major locus controlling circadian clock and secondary metabolism in Arabidopsis
Gabur I	P-601	Genome structural variation associated with disease resistance in Brassica napus
Ganal M.	P-205	SNP genotyping with optimized molecular marker sets for plant breeding in the Brassica species (B. napus, B. oleracea and B. rapa)
Gravot A.	P-609	An integrative approach to decipher mechanisms underlying quantitative resistance to blackleg in oilseed rape
Gravot A.	P-209	'DEsCriBe' project: A wide investigation of phytochemical diversity in leaves, roots and seeds of Brassica napus
Guo N.	P-113	High-quality de novo assembly of the cauliflower genome

Gutierrez A.G.	P-610	Novel Approaches to Downy Mildew Resistance in Brassica oleracea
Hahn C.	P-503	Exploring the diversity of kale: Glucosinolates, herbivores and phylogenetic relationships
Heinrich E.	P-305	Quantitative effects of day length and temperature on flowering time of oilseed rape (Brassica napus L.)
Hoque M.	P-402	QTL mapping combined with transcriptome analysis using broccoli and kohlrabi
Hu D.	P-222	Expanding the gene pool of Brassica napus and exploiting its genetic diversity
Ihien E.	P-108	Recreating genomically stable rapeseed
Jedryczka M	P-628	Coming closer: comparing the precision of Plasmodiophora brassicae detection in soils
Jiquel A.	P-612	Identification and functional analysis of late effectors involved in the systemic colonization of oilseed rape (Brassica napus) by Leptosphaeria maculans
Kang J.	P-611	Genome-Wide Identification of TIR-NBS-LRR Genes Related with Fusarium oxysporum f.sp.conglutinans in Cabbage
Karandeni Dewage C.S.	P-613	Understanding major gene-mediated resistance in Brassica napus (oilseed rape) against the apoplastic fungal pathogen, Pyrenopeziza brassicae (light leaf spot)
Katarina R.P.	P-210	Genetic diversity of white cabbage (Brassica oleracea var. capitata L.) inbred lines based on simple sequence repeat (SSR) markers and its relation to hybrid performance
Katche E.	P-110	Coming together again: the A and C genome recombine to make a new, single genome in B. juncea × B. carinata interspecific hybrids.
Klages N.	P-502	Genetic variation, inheritance and mapping of QTL for the seed storage proteins cruciferin and napin in the oilseed rape DH population SGD14 x Express617
Knoch D.	P-206	DFG-Predict: Omics-based prediction of hybrid performance and systems genetic analyses in spring-type oilseed rape
Kurina A.	P-207	Trait collection of VIR small radish (Raphanus sativus L.)
Lécureuil A.	P-508	Genetic architecture of seed quality in Brassicaceae seeds
Li C.	P-220	Towards Functional Characterization of Pod Shatter Resistant Genes in Brassica napus
Li C.	P-221	Investigation of branch angle in Brassica napus towards yield improvement at high density planting
Li P.	P-202	Transcriptome and methylome profiling of the different genotypes response to vernalization in Brassica rapa
Li Z.	P-624	Establishment of a LAMP Approach for Detection of Leptosphaeria biglobosa
Liersch A.	P-505	Associations of microsatellite and AFLP markers with yield and seed quality in winter oilseed rape (Brassica napus L.)
Liu F.	P-218	Cauliflower germplasm innovation via interspecific asymmetrical somatic hybridization combining backcrossing
Lysak M.A.	P-100	From diploids to polyploids and back: whole-genome duplications and diploidization in Brassicaceae
Mercier A.-S.	P-618	Study of white mustard (Sinapis alba) resistance mechanisms against the pollen beetle (Brassicoglyphus aeneus)
Mikolajczyk K.	P-616	Microsatellite / SCAR markers based genetic analysis of winter rapeseed (Brassica napus L.) lines varying in resistance to plasmodiophora brassicae wor. infection
Mitrousia G.K.	P-614	Towards identification of novel sources of resistance to phoma stem canker and light leaf spot pathogens in a Brassica napus diversity panel

Monakhos S.G.	P-605	Mapping of Clubroot Resistance Locus on Chromosome A05 in <i>B. rapa</i> L.
Murovec J.	P-103	Genome editing of Brassica species with preassembled Cas9-sgRNA ribonucleoproteins
Muthayil Ali A.	P-619	The role of <i>Leptosphaeria maculans</i> effectors in suppressing Brassica napus immune responses
Neequaye M.	P-500	Using novel broccoli lines to understand the role of a MYB transcription factor in glucosinolate production and sulphur metabolism
Niogret M.F.	P-107	Transcriptome profiling of leaf senescence and nitrogen deficiency response in oilseed rape ( <i>Brassica napus</i> )
Noel K.	P-615	Characterisation of temperature-sensitivity of Brassica napus resistance against <i>Leptosphaeria maculans</i>
Nou I.	P-212	Interspecies Hybridization in Brassicaceae Vegetables for Enriching Secondary Metabolites
Park S.	P-203	Developing Customer Oriented Doubled Haploid Inbred Lines of Brassicaceae Vegetables in Korea
Peng G.	P-626	Managing blackleg of canola in Canada-pathogen race dynamics, cultivar resistance and fungicide control
Poplawska W.	P-506	Variation of secondary dormancy in oilseed rape ( <i>Brassica napus</i> L.)
Rashmi Y.	P-215	Genetic diversity in the rapeseed and mustard – Indian context
Rolland S.	P-401	Development and validation of near-infrared spectroscopy models for predicting nitrogen and carbon contents in rapeseed tissues ( <i>Brassica napus</i> L.)
Routaboul J.-M.	P-627	Hydathodes, the Achille heel of brassica crops for black rot disease agent <i>Xanthomonas campestris</i>
