

Author-Speaker	Title	N. Poster
Alencikiene Gitana	Development of new food products by understanding consumers response to new knowledge about food	71
Alvito Paula	MYCOMIX and INFOGEST: a fruitful collaboration	53
Amigo Lourdes	Behaviour of soybean peptide lunasin under simulated gastrointestinal digestion: protective effect of Bowman-Birk protease inhibitor	87
Arranz Elena	Enhanced uptake and immune functionality of digested rosemary supercritical extract delivered through food grade vehicles.	126
Assunção Ricardo	Interactions between dietary toxins and gut mucosa: patulin effects on the structure and function of intestinal and immune cells	54
Aura Anna-Marja	Physiological functionality of alkali-O ₂ oxidized lignin	117
Ayala-Bribiesca Erik	Effect of Added Calcium on Cheddar Cheese Structure and In Vitro Digestion	79
Azzurra Papillo Valentina	Release of the antioxidant capacity from five different foods during a multistep enzymatic digestion protocol	65
Bastiaan-Net S.	The sensitivity of mealworm Tropomyosin to in vitro digestion is influenced by heat treatment.	132
Blagoeva Galya	Genetic and phenotypic variation in amylolytic lactic acid bacteria	89
Borawska Justyna	Angiotensin I-converting enzyme (ACE) inhibitory activity of European carp (<i>Cyprinus carpio</i> L.) protein-derived digests and hydrolysates	35
Bornhorst Gail	An Engineering Approach to Study Food Digestion	9
Bourlieu Claire	Gastric lipase: interactions governing adsorption and distribution in model membranes	51
Bronze Maria Rosario	Phenolic composition of common bean (<i>Phaseolus vulgaris</i> L.): What enzymatic hydrolysis tell us?	96
Bronze Maria Rosario	Effect of digestion process in phenolic composition of fava beans	97
Bronze Maria Rosario	Can olive bioactive phytochemicals in synergy with probiotics control food-borne pathogens?	98
Bujor Oana-Crina	Inhibition of lipid oxidation by phenolic bilberry and lingonberry extracts in an in vitro digestion model	31
Caira Simonetta	Identification of casein phosphopeptides in the human blood after consumption of a hard long ripened cheese	95
Calvo-Lerma Joaquim	In vitro digestion of fats in patients undergoing enzymatic replacement therapy: set-up of the method and assays on milk digestion	115
Capuano Edoardo	The importance of molecular interactions on physiological effects of food	142
Çatalkaya Gizem	In vitro Bioaccessibility of Anthocyanins in Black Chokeberry (<i>Aronia melanocarpa</i>) Added Yogurts	130
Chianese Lina	Release of bioactive peptides and quercetin during mastication of fortified chewing-gum	139
Cilla Antonio	Antiproliferative activity of green and black teas polyphenols biosorbed into <i>Saccharomyces cerevisiae</i> and subjected to in vitro gastrointestinal digestion using human colon cancer Caco-2 cells	25
Cilla Antonio	STEROL BIOACCESSIBILITY FROM MILK-BASED FRUIT BEVERAGES: INFLUENCE OF FOOD MATRIX	26
Clemente Alfonso	What makes Bowman-Birk inhibitors from legumes indigestible?	86
Colantuono Antonio	Antioxidant potential of pomegranate peels along the gastrointestinal tract	74
Corstens Meinou	Food grade micro-encapsulation systems for appetite control	62
Damla Bilen Fatma	In vitro gastrointestinal digestion of polyphenols from plant processing by-products of black carrot (<i>Daucus carota</i>)	18
Darwish Randa	In vitro digestibility and bioaccessibility of <i>Chlamydomonas reinhardtii</i>	43
De Santis Michele	Exploring genetic differences in dietary fiber composition within old and modern durum wheat genotypes	90
Deglaire Amélie	The impact of human milk pasteurization is lower on the preterm than on the term milk digestion	52
Dekker Matthijs	A Physiological Based Nutrikinetic Model for ITC Bioavailability from Broccoli	119
Delia Etleva	Microbial phytase as a way for improving growth performance and nutrient's digestibility of weaned piglets.	64
Devold Tove	Developing an In-Vitro Dynamic Model of the Stomach and Small Intestine for Milk Products with Rheological Monitoring	37
Di Nunzio Mattia	Anti-inflammatory effects of ancient grains: the case of <i>Triticum monococcum</i>	28
Dufour Claire	Matrix impact on the bioaccessibility of plant polyphenols in the gastric tract	30
Duygu Ceylan F.	Comparing the antioxidant properties and in vitro bioaccessibility of phenolic compounds in green tea and sea buckthorn leaf tea	77

Egger Lotti	The Harmonized Infogest in vitro digestion protocol: Moving from Knowledge to Action	55
Fanø Mathias	Purification and chemical and functional characterisation of human gastric lipase produced in HEK293 cells	135
Fernández López Juana	Characterization and In vitro digestibility of different rich-fibre extracts from agroindustrial coproducts: Effect on cholesterol retention	107
Flahaut Christophe	Interest of the high resolution nanoLC-mass spectrometry in the systematic characterization of peptide complex mixture issued from in vitro gastro-intestinal digestion of bovine haemoglobin	101
Floury Juliane	Mathematical model of in vitro digestion of infant formulas	47
Freitas Marisa	Effects of human digestion on microcystin-LR and cylindrospermopsin: the importance in integrating the bioaccessibility in health risk assessment	102
Gedi Mohamed A.	Digestibility of nutritionally rich chloroplast material	61
Giang Thuy Minh	Modeling in vitro digestion of emulsions: effects of droplet size and oil composition on lipolysis kinetics and fatty acid bioaccessible profiles	122
Giromini Carlotta	Citomodulatory role of whey, casein, pea and soya proteins after in vitro gastro-intestinal digestion	63
Gómez-Mascaraque Laura G.	Enhancing flavonoids bioavailability through microencapsulation in edible biopolymeric matrices	114
Gonzalez Bermudez Carlos Alberto	In vitro fermentability of locust bean gum and Modified Rice and Corn Starches by infant gut microbiota	5
Grundy Myriam	Lipid bioaccessibility and digestibility during in vivo and in vitro digestion of almond seeds	44
Güven O.	Changes in antioxidant activity and quality of extrudates after addition of artichoke leaf powder	58
Hamzalioglu Aytül	Investigation of the Reactions of Acrylamide during in vitro Multistep Enzymatic Digestion of Thermally Processed Foods	113
Harris Suzanne	Exploring Cell Wall Polysaccharides as Prebiotics	70
Havlik Jaroslav	Effect of Selected Foods on the Adhesion of Lactobacilli in Cell Culture Modell	83
Huart François	Effect of drying temperature, initial moisture content and particle size distribution of corn grain on the performance of broiler chickens and in vivo digestibility of dry matter	109
Huynh Tien Dat	In vitro starch digestibility of Vietnamese cooked rice explained by their physicochemical properties	136
Ibargoitia M. L.	Occurrence of oxidation during in vitro digestion of margarine rich in polyunsaturated acyl groups	68
Imran Jiwani Shahwar	Isolation, Structural and Functional Characterization of Bioactive Compounds from Cucurbits	72
Jambec Dubravka	The estimation of mineral bioavailability of buckwheat enriched whole wheat pasta by using molar ratios	15
Jauregi Paula	Caffeine entrapment by beta-lactoglobulin nanoparticles and release under gastrointestinal conditions	111
Johansson Daniel	In vitro digestion of rye products: impact of microstructure on glucose and maltose release and digesta viscosity	127
Joubran Yousef	Evaluating the antioxidant capacity of Maillard reaction products of lactoferrin and alpha-lactalbumin during in vitro gastro-duodenal digestion	2
Kamiloglu Senem	Stability of polyphenols in black carrot jams and marmalades subjected to in vitro gastrointestinal digestion	17
Kardinaal Alwine	Validation of the IntelliCap® system as a tool to study changes in the small intestinal microbiota in a dietary intervention study	82
Karim Zida	Inhibitory effect of chlorogenic acid on in vitro starch digestion of potato starch and cooked potato	94
Khodorova Nadezda	Non-targeted urinary metabolomic profiling for determination of metabolites associated with meat intake and the processes of meat cooking.	93
Knutsen Svein	Fate of arabinoxylan and beta-glucan during simulated digestion by human duodenal and stomach fluids and during in vitro fermentation with human faecal slurry	34
Kosik Ondrej	Following the changes of in vitro digested cereal and fungal β -glucans	128
Koss-Mikołajczyk Izabela	The influence of sterilization with EnbioJet Microwave Flow Pasteurizer on composition of phytocomplex and biological activity of blue-berried honeysuckle (<i>Lonicera caerulea</i> L. var <i>edulis</i>) pulp	131
Krasilnikova J.	Effects of two type of red wines on the digestive system	69

Lazaridou Athina	In vitro starch digestibility and in vivo glycemic response of gluten-free bread enriched with chickpea and acorn flours	66
Lesmes Uri	Potential adverse effects of dietary carrageenan: In vitro evidence of interference with digestive proteolysis, gut epithelial function and the colon microbiome	1
Liu Weilin	Dietary iron-initiated liposome peroxidation and the influence of food ingredients during simulated gastric digestion	137
Lončarević Ivana	Impact of different type of lecithin on crystallization properties of non trans fat	16
López-Fandiño Rosina	Immunomodulatory hydrolysates of egg white proteins	121
Luo Qi	Mechanistic approaches towards understanding the kinetics of gastric digestion	103
Macierzanka Adam	Transport of food digesta and model particles in the small intestinal mucus	46
Mamone Gianfranco	Gastrointestinal resistant peptide from T. monococcum omega-gliadin plays a protective effect in Celiac Disease	32
Mamone Gianfranco	Human gastrointestinal digestion of the alpha(2)-gliadin 33-mer peptide: implication in celiac disease.	33
Mancino Roberta	Influence of dairy cow diet on the fatty acid composition of caciotta cheese and subsequent effects on gut microbiota by an in vitro digestion model	99
Mariano Giovanna	Effect on antioxidant activity of microalgae biomass under simulated digestion	88
Marra Francesco	Bioaccessibility of active principles: an in-vitro reproduction of human physiology	100
Martins Carla	First bioaccessibility assessment of patulin in cereal and fruit based baby foods using the harmonized IVD model	56
Meléndez Martínez Antonio J.	Bioaccessibility of phytoene and phytofluene as compared to lycopene in tomatoes and derived products: influence of olive oil addition	19
Meléndez Martínez Antonio J.	Bioaccessibility of phytoene, phytofluene and epoxy-carotenoids as compared to other carotenoids in oranges: influence of squeezing and olive oil addition	20
Meléndez Martínez Antonio J.	Bioaccessibility of carotenoids from Ortanique juices submitted to different industrial processing	21
Meléndez Martínez Antonio J.	Bioaccessibility of the colourless carotenoids phytoene and phytofluene in Navel Lane Late orange juices: Influence of pasteurization and homogenization conditions	22
Menard Olivia	Does protein enrichment on yogurts have an effect on gastric emptying and impact on proteolysis kinetics?	50
Mennella Ilario	Bitter and sweet taste influence appetite before food ingestion: a matter of endocannabinoid response	80
Mercadante Adriana Z.	Electrolytes influence bioaccessibility of carotenoids from murici fruit (Byrsonima crassifolia)	75
Meshulam Dafna	Comparative In vitro intestinal lipolysis of emulsified bioactive lipids evaluated in a pH stat model	3
Moldoveanu Anca Maria	MEDICAL STUDENTS AND READY-TO- EAT TYPE OF FOOD	91
Molina Elena	Food allergic responses induced by OVA in BALB/c and C3H/HeOul mice.	85
Monaci Linda	Investigation on T-2 and HT-2 toxins bioaccessibility using an in vitro human digestion model: the case of naturally versus artificially contaminated bread samples.	138
Moscovici Alice M.	Impact of Thermal Processing of Bovine Lactoferrin on Gut Microbiota	4
Naar Zoltan	Effect of mastication on the balance of simulated gut microbiota developed on stuffed pastry digested in Infogest harmonized model and modified Versantvoort model	106
Nagy András	In vivo digestibility of common bean derived alpha-amylase inhibitors	42
Nedeljkovic Natasa	Soybean bran as a potent fat replacer in gluten-free cookie formulation	14
Nieva-Echevarría B	Effect of smoking with an aqueous smoke flavouring on lipid oxidation during fish in vitro digestion	23
Nieva-Echevarría B	Optimization of a fish lipid in vitro digestion model using 1H NMR: bile salts, a key factor in lipolysis extent	24
Nyemb Kéra	How the physicochemical properties of egg white gel influence the in vivo gastric digestion process: Spatio-temporal mapping	45
Odjo Sylvanus	Could salt-soluble proteins denaturation index (Promatest) of corn grain help to predict in vitro digestibility of dry matter?	110
Opazo-Navarrete Mauricio	Effect of heat treatment on in vitro gastric digestion of quinoa protein	73

Ossieur Wendy	Design of Experiment: an efficient method for the establishment of an adequate cryopreservation protocol for colon associated mixed microbial communities.	120
Pastrana Lorenzo	Structuration of α -lactalbumin solutions by formation of self-assembly nanotubes	112
Perez Hernandez Lucia	Enzymatic starch digestion of Borlotti beans by pancreatic α -amylase and Amyloglucosidase, implications for fibre yield and composition	92
Petrat-Melin Bjørn	Peptidomics and bioactivity of in vitro digested bovine beta- and kappa-casein variants	116
Piloso Ana M. R.	Egg white nanocarriers for folic acid: profile of in vitro gastrointestinal digestion products and biological activity of the vitamin	10
Piloso Ana M. R.	Simulated digestion of glycosylated caseinate - polyphenol complexes: Effect on bifidobacteria and tumor cell lines	11
Piloso Ana M. R.	In vitro gastrointestinal digestion of interfacial films formed by proteins or polysaccharides	12
Pineda Vadillo Carlos	Delivering anthocyanins in the gastrointestinal tract: processing conditions and food matrix effect	48
Pineda Vadillo Carlos	Towards a new generation of DHA-enriched foods: maximizing DHA bioavailability by considering the food matrix effect	49
Pinheiro Ana Cristina	Evaluation of the in vitro behaviour of curcumin nanoemulsions using different gastrointestinal models	67
Planes-Muñoz D.	Satiety effect of some plant extracts. The case of green tea, curcumin and ginseng	6
Romano Annalisa	Physico-chemical characterization and in vitro protein digestion of dehulled common beans (<i>Phaseolus vulgaris</i> L.),	140
Romano Annalisa	Structure and digestibility properties of bean flour following microbial transglutaminase modification	141
Ros Gaspar	Effect of in vitro gastrointestinal digestion on lactoferrin content of human milk and infant formula	7
Rul Françoise	Gnotobiotic animals reveals new probiotic potential of the yogurt lactic acid bacterium <i>Streptococcus thermophilus</i>	124
Sams Laura	Relevant pH and enzymes for simulating intragastric digestion	123
Šarić Bojana	Blueberry pomace as a source of bioactive compounds for enrichment of gluten-free diet	13
Sassene Philip	Comparison of lipases for in vitro models of gastric digestion: Lipolysis of mixtures of medium and long chain triglycerides using two infant formulas as models	134
Scheuble Nathalie	Controlled Mechanical and Structural Properties of Biopolymer Adsorption Layers under Gastric Conditions	118
Schneider Felix	Assessment of gastrointestinal transit conditions in fasted and fed state using a wireless motility capsule (SmartPill®)	125
Siemianowska Ewa	Influence of dietary fibre on availability of minerals from cakes fortified with different calcium compounds	105
Silva Fernanda	Influence of protein-phenolic interactions on antioxidant capacity and in vitro digestibility of flaxseed products	129
Simal Susana	Influence of Freeze and Convective Drying on in Vitro Gastric Digestion of Apple	8
Singh Jaspreet	In vitro digestibility of starch in cooked potatoes as affected by guar gum: Microstructural and rheological characteristics	104
Steppeler Christina	Formation of malondialdehyde (MDA) during in vitro digestion of cooked beef, pork, chicken and salmon.	59
Szerdahelyi Emoke	Stability of imidazole dipeptides during food processing	40
Szerdahelyi Emoke	Mechanically deboned turkey meat with improved digestibility and biological value	41
Tavares Ana	Bioaccessibility of aflatoxin M1 in three artificially contaminated infant formula using a standardised static in vitro digestion method	57
Tullberg Cecilia	In vitro study of gastrointestinal oxidation of marine long chain n-3 polyunsaturated fatty acids – comparison between models based on human fluids or porcine extracts	39
Turgeon Sylvie L.	The cheese matrix impact protein in vitro digestion	78
Ulleberg Ellen	Ex vivo digestion of proteins and fat in bovine and buffalo milk focusing β -lactoglobulin.	38
Valli Veronica	Assessment of antioxidant capacity and characterization of (poly)phenolic compounds of whole grain cookies after chemical extractions and a simulated digestion under static conditions	29
Van Aken George	In silico modelling of digestion	133
Vegarud Gerd	Rheological behavior and droplet size distribution of emulsions stabilized by whey proteins and chitosan during ex vivo digestion	36
Villalba Talens Maripaz	In vitro evaluation of iron bioaccessibility in microencapsulated iron-enriched breads	27

Viuda Martos Manuel	Changes in the antioxidant potential of dietary fiber powder obtained from lemon (Citrus limon) co-products during In Vitro gastrointestinal digestion	108
Volstatova Tereza	The Effect of Breast Milk and its Oligosaccharide Fractions on Lactobacilli Adhesion	84
Walker Joel M	Coffee melanoidins-enriched bread but not bread crust melanoidins-enriched bread increases satiety and improves glucose metabolism in the short term	81
Wiczowski Wieslaw	Changes in the content and composition of betalains in red beetroot during fermentation	76
Wiese Maria	MiniGut - a small volume colon model with increased throughput	60
