

Title: TRADITIONAL TOMATO CULTIVARS IN EUROPE: TRADITOM and BEYOND

Convenors: Antonio Granell and Antonio Monforte (IBMCP-CSIC), Jaume Prohens (COMAV-UPV), Mathilde Causse (INRA-Avignon)

Aims and scope: To get together with other scientists and horticulturists interested in traditional tomato cultivars in Europe. Increase communication between scientific groups and growers working in traditional tomato varieties, from germplasm curators and other scientists interested in different aspects of traditional tomatoes such as horticulturists, geneticists, plant physiologists or molecular biologists, to farmers and farmer associations. Build a network linking all groups and resources. Identify the sector problems and discuss science-based solutions.

Anticipated duration: 2-3 h

Number of attendees: >20-25
